INSURANCE.

Circular No. 35.

To—All District Magistrates, the Special Magistrate, Kolar Gold Fields,
and the City Magistrates of Bangalore and Mysore.

That as the official designation "Magistrate" is often omitted to be added to the signature of Magistrates and their seals seldom affixed in attesting copies of a horoscope or other document produced by proposers for life insurance, the Secretary to the State Life Insurance Committee requests that, in future, whenever such copies are presented for attestation, the Magistrates will be so good as to state invariably that it is a "true copy of the original" under his seal and signature with the designation "Magistrate" added.

The District Magistrates are requested to be so good as to issue needful instructions to all their subordinate Magistrates.

E. R. SUBROYER, *Secretary, Insurance Committee.*

PUBLIC WORKS DEPARTMENT.

Notification No. 897—8666, dated 27th December 1901.

I. To ensure the continuity of the supply of Electrical Power to the Gold Fields from the Cauvery Power Works during the hot weather, when it is apprehended that the quantity of water in the river might in years of short rainfall, fall below what is necessary to generate the full power, the Government hereby authorize the Superintendent of the Cauvery Power Scheme Works to shut off the hot weather supply to the Mahadevamantri or Holesal Channel from 1st March to 1st June of each year, (commencing from the 1st March 1902), should necessity for such a course arise, without any previous notice of the same being given to the raiyats concerned.

II. Knowing that the supply in the above channel might be cut off at any time during the summer months, viz., from 1st March to 1st June, without any previous notice, the raiyats in future will either cease to cultivate during the above period, or do so at their own risk, and the Government will not consider itself liable for any compensation.

III. The Superintendent, Revenue Survey, will be requested to reduce the present assessment on the lands in question to such an extent as to cover the period for which water may not be available.
